

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                                      |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | Phase 3, Multicenter, Open-label Study to Assess the Long-term Safety and Tolerability of Rimegepant for the Acute Treatment of Migraine (With or Without Aura) in Children and Adolescents ? 6 to < 18 Years of Age |
| Short Title:             | Long-term Safety Study of Rimegepant in Pediatric Subjects for the Acute Treatment of Migraine                                                                                                                       |
| Protocol Number:         | 929267991520419160                                                                                                                                                                                                   |
| NCT Number:              | NCT04743141                                                                                                                                                                                                          |
| Sponsor Name:            | Pfizer                                                                                                                                                                                                               |
| Investigational Product: | rimegepant                                                                                                                                                                                                           |
| Phase:                   | PHASE3                                                                                                                                                                                                               |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                                            |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                                                                                               |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. The frequency and severity of on-treatment and treatment-emergent adverse events, serious adverse events, adverse events leading to discontinuation, clinically significant lab abnormalities: To evaluate the safety and tolerability of rimegepant in children and adolescents (6 to < 18 years of age). |
| Secondary Obj.:    | 1. The frequency and severity of hepatic-related adverse events and frequency of hepatic-related adverse events leading to treatment discontinuation                                                                                                                                                          |

### 2.2 Background & Rationale

The purpose of this study is to test the long-term safety of rimegepant in the acute treatment of migraine in children and adolescents (? 6 to < 18 years of age).

## 3. Study Design & Methodology

|                   |                                                         |
|-------------------|---------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING |
| Target N:         | 600                                                     |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

- History of migraine (with or without aura) for ? 6 months before Screening.
- History of 1 to 8 moderate or severe attacks per month during the 2 months prior to screening.
- 1 or more migraine days requiring treatment during the Observation Phase.
- Prophylactic migraine medication is permitted if the dose has been stable for at least 12 weeks prior to the Screening Visit.

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

5. Ability to distinguish between migraine and other types of headaches.
6. Weight  $\geq 15$  kg. For EU countries only: Participants 12 to  $< 18$  years of age must have a body weight of  $\geq 25$ kg.
7. Adequate venous access for blood sampling.
8. Male and female participants 6 to  $< 18$  years of age (participants must not reach their 18th birthday on or before the Baseline visit).

## 4.2 Exclusion Criteria

1. History of cluster headache or hemiplegic migraine headache.
2. Confounding and clinically significant pain syndrome.
3. Current uncontrolled and/or untreated psychiatric condition for a minimum of 6 months prior to the Screening Visit (lifetime history of psychosis and/or mania are excluded).
4. History of suicidal behavior or at risk of self-harm/harm to others.
5. History of major psychiatric disorder.
6. Current diagnosis or history of substance abuse
7. Reported current use of or tested positive at Screening for drugs of abuse.

## 11. Study Identifiers & Governance

|                  |                                                                                                |
|------------------|------------------------------------------------------------------------------------------------|
| Primary ID:      | 929267991520419160                                                                             |
| Registry Number: | NCT04743141                                                                                    |
| Sponsor:         | Pfizer                                                                                         |
| Study Title:     | Long-term Safety Study of Rimegepant in Pediatric Subjects for the Acute Treatment of Migraine |
