

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open-label, Randomized, Parallel Group, Non-inferiority Study to Investigate the Pharmacokinetics, Pharmacodynamics, Safety and Tolerability of a New Maintenance Dosing Regimen of Ofatumumab, Followed by Extended Treatment in Participants With Relapsing Multiple Sclerosis
Short Title:	Pharmacokinetics, Pharmacodynamics, Safety and Tolerability of a New Maintenance Dosing Regimen of Ofatumumab
Protocol Number:	938400358219260155
NCT Number:	NCT06869785
Sponsor Name:	Novartis
Investigational Product:	ofatumumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Ofatumumab plasma pharmacokinetics - area under the curve
Secondary Obj.:	1. Ofatumumab plasma pharmacokinetics - minimum observed plasma concentration 2. Ofatumumab plasma pharmacokinetics - maximum observed plasma concentration 3. Incidence of Adverse events (AE) and Serious adverse events (SAE)

2.2 Background & Rationale

This study will evaluate the pharmacokinetics, pharmacodynamics, safety and tolerability of a new dosage of ofatumumab compared to the approved dosage of ofatumumab followed by extended treatment in participants with relapsing multiple sclerosis.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	180

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Signed informed consent must be obtained prior to participation in the study.
- * Male or female study participants aged 18 to 60 years (inclusive) at screening.
- * Diagnosis of multiple sclerosis (MS) according to the 2017 Revised McDonald criteria (Thompson et al 2018). Relapsing forms of MS: relapsing-remitting MS (RRMS), or active secondary progressive MS (SPMS).

4.2 Exclusion Criteria

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Participants suspected of not being able or willing to cooperate or comply with study protocol requirements in the opinion of the Investigator or emergence of any clinically significant condition/disease (e.g. active systemic bacterial, viral or fungal infections) during screening prior to Day 1 which might result in safety risk for participants.
- * Participants with history of confirmed progressive multifocal leukoencephalopathy (PML) or neurological symptoms consistent with PML.
- * Participants at risk of developing or having reactivation of hepatitis
- * Emergence of active chronic disease (or stable but treated with immune therapy) prior to Day 1 of the immune system other than MS (e.g. rheumatoid arthritis, scleroderma, Sjögren's syndrome, Crohn's disease, ulcerative colitis, etc.) or with immunodeficiency syndrome (hereditary immune deficiency, drug-induced immune deficiency).
- * Pregnant or nursing (lactating) women
- * History of lymphoproliferative disease or any known malignancy or history of malignancy of any organ system (except for basal cell carcinoma, or squamous cell carcinomas of the skin that have been treated with no evidence of recurrence in the past 3 months).
- * Participants taking prohibited therapies, including B cell targeted therapies (e.g. such as ocrelizumab, rituximab, ofatumumab, ublituximab, and inebilizumab)

Other protocol-defined inclusion/exclusion criteria may apply

11. Study Identifiers & Governance

Primary ID:	938400358219260155
Registry Number:	NCT06869785
Sponsor:	Novartis
Study Title:	Pharmacokinetics, Pharmacodynamics, Safety and Tolerability of a New Maintenance Dosing Regimen of Ofatumumab

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
