

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open-Label, Randomized Phase 3 Trial of Nivolumab, or Nivolumab Plus Ipilimumab, or Nivolumab Plus Platinum Doublet Chemotherapy Versus Platinum Doublet Chemotherapy in Subjects With Chemotherapy-Naïve Stage IV or Recurrent Non-Small Cell Lung Cancer (NSCLC)
Short Title:	An Investigational Immuno-therapy Trial of Nivolumab, or Nivolumab Plus Ipilimumab, or Nivolumab Plus Platinum-doublet Chemotherapy, Compared to Platinum Doublet Chemotherapy in Patients With Stage IV Non-Small Cell Lung Cancer (NSCLC)
Protocol Number:	1011747896194183411
NCT Number:	NCT02477826
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	cisplatin
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression-Free Survival Per BICR: Progression-Free Survival then (PFS) is defined as the time between the date of randomization and the date of first documented disease progression, based on BICR assessments (per RECIST v1.1), or death due to any cause, whichever occurs first based on Kaplan-Meier estimates. Progressive Disease (PD): At least a 20% increase in the sum of diameters of target lesions, taking as reference the smallest sum during the study (this includes the baseline sum if that is the smallest on study). In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of at least 5 mm. 2. Overall Survival: OS for all randomized participants is the time between randomization date and the date of death from any cause.
Secondary Obj.:	1. Objective Response Rate (ORR) Per BICR 2. Percentage of Participants With Symptom Deterioration at Week 12 Assessed Via Lung Cancer Symptom Scale

2.2 Background & Rationale

The purpose of this study is to show that Nivolumab, or Nivolumab plus Ipilimumab, or Nivolumab plus Platinum-Doublet Chemotherapy improves progression free survival and/or overall survival compared with chemotherapy in patients with advanced lung cancer.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: COMPLETED
Target N:	2747

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Subjects with histologically confirmed Stage IV or recurrent NSCLC squamous or non-squamous histology, with no prior systemic anticancer therapy
- * Subjects must have programmed death-ligand 1 (PD -L1) immunohistochemical (IHC) testing, with results, performed by the central lab during the Screening period
- * Eastern Cooperative Oncology Group (ECOG) Performance Status of ? 1
- * Measurable disease by CT or MRI per response evaluation criteria in solid tumors version 1.1 (RECIST 1.1) criteria

4.2 Exclusion Criteria

- * Subjects with untreated Central nervous system (CNS) metastases are excluded
- * Subjects with an active, known or suspected autoimmune disease are excluded
- * Any positive test for hepatitis B virus or hepatitis C virus or human immunodeficiency virus (HIV) indicating acute or chronic infection

Other protocol defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID:	1011747896194183411
Registry Number:	NCT02477826
Sponsor:	Bristol Myers Squibb
Study Title:	An Investigational Immuno-therapy Trial of Nivolumab, or Nivolumab Plus Ipilimumab, or Nivolumab Plus Platinum-doublet Chemotherapy, Compared to Platinum Doublet Chemotherapy in Patients With Stage IV Non-Small Cell Lung Cancer (NSCLC)

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
