

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3 Randomized Clinical Trial of Nivolumab Alone, Nivolumab in Combination With Ipilimumab, or Investigator's Choice Chemotherapy in Participants With Microsatellite Instability High (MSI-H) or Mismatch Repair Deficient (dMMR) Metastatic Colorectal Cancer
Short Title:	A Study of Nivolumab, Nivolumab Plus Ipilimumab, or Investigator's Choice Chemotherapy for the Treatment of Participants With Deficient Mismatch Repair (dMMR)/Microsatellite Instability High (MSI-H) Metastatic Colorectal Cancer (mCRC)
Protocol Number:	134361921438674349
NCT Number:	NCT04008030
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	fluorouracil
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression-free Survival (PFS) by Blinded Independent Review Center (BICR) - Arm B vs. Arm A All Lines Centrally Confirmed MSI-H/dMMR: BICR-assessed Progression-free survival (PFS) is defined as the time from the randomization date to the date of first objectively documented disease progression per RECIST 1.1 (i.e, radiologic) or death due to any cause, whichever occurs first. 2. Progression-free Survival (PFS) by Blinded Independent Review Center (BICR) - Arm B vs. Arm C 1L Participants Centrally Confirmed MSI-H/dMMR: BICR-assessed Progression-free survival (PFS) is defined as the time from the randomization date to the date of first objectively documented disease progression per RECIST 1.1 (i.e, radiologic) or death due to any cause, whichever occurs first.
Secondary Obj.:	1. Progression-free Survival (PFS) by Blinded Independent Review Center (BICR) - 1L Participants 2. Progression-free Survival (PFS) by Blinded Independent Review Center (BICR) - Arm B vs. Arm A All Randomized Participants 3. Progression-free Survival (PFS) by Blinded Independent Review Center (BICR) - 1L Randomized Participants

2.2 Background & Rationale

The main purpose of this study is to compare the clinical benefit, as measured by Progression-Free Survival (PFS), Objective Response Rate (ORR), and Overall Survival (OS), achieved by nivolumab in combination with ipilimumab or by nivolumab monotherapy in participants with Microsatellite Instability High (MSI-H) or Mismatch Repair Deficient (dMMR) metastatic colorectal cancer (mCRC). This study will also compare nivolumab plus ipilimumab combination vs chemotherapy for treatment of MSI-H/dMMR mCRC participants.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

3. Study Design & Methodology

Design Framework: Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N: 839

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Histologically confirmed recurrent or metastatic colorectal cancer (CRC) irrespective of prior treatment history with chemotherapy and/or targeted agents not amenable to surgery (Applicable only during Part 1 enrollment of the study)
- * Histologically confirmed recurrent or metastatic CRC with no prior treatment history with chemotherapy and/or targeted agents for metastatic disease and not amenable to surgery (Applicable during Part 2 enrollment of the study)
- * Known tumor microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) status per local standard of practice
- * Eastern cooperative oncology group (ECOG) performance status lower than or equal to 1

4.2 Exclusion Criteria

- * An active, known or suspected autoimmune disease
- * History of interstitial lung disease or pneumonitis
- * Known history of positive test for human immunodeficiency virus (HIV) or known acquired immunodeficiency syndrome (AIDS)

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 134361921438674349
Registry Number: NCT04008030
Sponsor: Bristol Myers Squibb
Study Title: A Study of Nivolumab, Nivolumab Plus Ipilimumab, or Investigator's Choice Chemotherapy for the Treatment of Participants With Deficient Mismatch Repair (dMMR)/Microsatellite Instability High (MSI-H) Metastatic Colorectal Cancer (mCRC)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
