

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3, Multicenter, Randomized, Partially Blinded, Palivizumab- Controlled Study to Evaluate the Safety, Efficacy, and Pharmacokinetics of MK-1654 in Infants and Children at Increased Risk for Severe RSV Disease
Short Title:	Clesrovimab (MK-1654) in Infants and Children at Increased Risk for Severe Respiratory Syncytial Virus (RSV) Disease (MK-1654-007)
Protocol Number:	145584772246977579
NCT Number:	NCT04938830
Sponsor Name:	Merck
Investigational Product:	palivizumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Participants with solicited injection-site Adverse Events (AEs) in RSV Season 1: Percentage of participants with solicited injection-site AEs in RSV Season 1 2. Participants with solicited daily body temperature with fever in RSV Season 1: Percentage of participants with solicited daily body temperature with fever in RSV Season 1 3. Participants with solicited systemic AEs in RSV Season 1: Percentage of participants with solicited systemic AEs in RSV Season 1
Secondary Obj.:	1. Participants with RSV-associated medically attended lower respiratory infection (MALRI) in RSV Season 1 2. Participants with RSV-associated hospitalization in RSV Season 1 3. Participants with solicited injection-site AEs in RSV Season 2

2.2 Background & Rationale

This study aims to evaluate the safety and tolerability of clesrovimab compared to palivizumab as assessed by the proportion of participants experiencing adverse events (AEs).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: COMPLETED
Target N:	1003

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Participants at increased risk for severe RSV infection recommended to receive palivizumab in accordance with national or local guidelines or professional society recommendations.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Is available to complete the follow-up period.

4.2 Exclusion Criteria

* Requires mechanical ventilation at time of enrollment.

* Has a life expectancy ≤ 6 months.

* Has known hepatic or renal dysfunction, or chronic seizure disorder.

* Is hospitalized at the time of randomization unless discharge is expected within 7 days after randomization.

* Has severe immunodeficiency or is severely immunocompromised.

* Has known hypersensitivity to any component of clesrovimab or palivizumab.

11. Study Identifiers & Governance

Primary ID: 145584772246977579

Registry Number: NCT04938830

Sponsor: Merck

Study Title: Clesrovimab (MK-1654) in Infants and Children at Increased Risk for Severe Respiratory Syncytial Virus (RSV) Disease (MK-1654-007)

15. Sign-off & Approval
