

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3, Randomized, Double-blind Trial of Nivolumab in Combination With Intravesical BCG Versus Standard of Care BCG Alone in Participants With High-risk Non-muscle Invasive Bladder Cancer That Is Persistent or Recurrent After Treatment With BCG
Short Title:	A Study Comparing the Efficacy and Safety of Nivolumab in Combination With Bacillus Calmette-Guerin (BCG) Versus BCG Alone in Participants With High-Risk Non-Muscle Invasive Bladder Cancer (HR NMIBC)
Protocol Number:	422035838703589492
NCT Number:	NCT04149574
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	nivolumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Part 2: Event Free Survival: The time between the date of randomization and the date of first documented event or death due to any cause, whichever occurs first. Events include recurrence of disease (TaHG, T1, or CIS) and progression of disease. Data Not Collected (DNC)
Secondary Obj.:	1. Part 2: Worsening-Free Survival 2. Part 2: Overall Survival 3. Part 2: Complete Response Rate at 13 Weeks

2.2 Background & Rationale

A study comparing nivolumab and bacterial drugs given to help the body's immune system in the bladder versus bacterial drugs alone in high risk bladder cancer participants.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: TERMINATED
Target N:	13

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Persistent or recurrent disease ? 24 months of last BCG dose, but not classified as BCG unresponsive
- * Histologically confirmed persistent or recurrent high-risk non-muscle-invasive urothelial carcinoma (UC)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Treated with at least 1 adequate course of induction BCG therapy (at least 5 out of 6 doses)
- * Eastern Cooperative Oncology Group (ECOG) performance status (PS) 0-2

4.2 Exclusion Criteria

- * Previous or concurrent muscle invasive, locally advanced, or disseminated/metastatic UC
- * UC in the upper genitourinary tract (kidneys, renal collecting systems, ureters) within 24 months of enrollment
- * UC and/or CIS in the prostatic urethra within 12 months of enrollment

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 422035838703589492

Registry Number: NCT04149574

Sponsor: Bristol Myers Squibb

Study Title: A Study Comparing the Efficacy and Safety of Nivolumab in Combination With Bacillus Calmette-Guerin (BCG) Versus BCG Alone in Participants With High-Risk Non-Muscle Invasive Bladder Cancer (HR NMIBC)

15. Sign-off & Approval
