

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Single Arm, Open Label Phase 2 Study of Tucatinib in Combination With Trastuzumab Deruxtecan in Subjects With Previously Treated Unresectable Locally-Advanced or Metastatic HER2+ Breast Cancer
Short Title:	A Study of Tucatinib Plus Trastuzumab Deruxtecan in HER2+ Breast Cancer
Protocol Number:	132759827292932301
NCT Number:	NCT04539938
Sponsor Name:	Pfizer
Investigational Product:	tucatinib
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Confirmed Objective Response Rate (cORR) Per Response Evaluation Criteria in Solid Tumors (RECIST) Version 1.1 According to Investigator (INV) Assessment: Confirmed objective response rate was defined as the percentage of participants with a confirmed complete response (CR) or partial response (PR) per investigator according to RECIST v1.1. For a response to be considered confirmed, the subsequent response had to be at least 4 weeks after the initial response. CR: disappearance of all target lesions and non-target lesions. Any pathological lymph nodes (whether target or non-target) must have reduction in short axis to less than ($<$)10 millimeters (mm). PR: a greater than equal to ($\geq$) 30 percent (%) decrease in the sum of diameters of target lesions, taking as reference the baseline sum of diameters. 95% exact confidence interval (CI) was based on Clopper-Pearson method.
Secondary Obj.:	1. Progression-Free Survival (PFS) Per RECIST v1.1 According to INV 2. Duration of Response (DOR) Per RECIST v1.1 According to INV 3. Disease Control Rate (DCR) Per RECIST v1.1

2.2 Background & Rationale

This trial studies how well the drug tucatinib works when given with trastuzumab deruxtecan (T-DXd). It will also look at what side effects happen when these drugs are given together. A side effect is anything a drug does besides treating cancer.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: COMPLETED
Target N:	70

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID:	132759827292932301
Registry Number:	NCT04539938
Sponsor:	Pfizer
Study Title:	A Study of Tucatinib Plus Trastuzumab Deruxtecan in HER2+ Breast Cancer

15. Sign-off & Approval
