

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Phase I/II Pharmacokinetic Multi-Tumor Study of Subcutaneous Formulation of Nivolumab Monotherapy
Short Title:	A Study of Subcutaneous Nivolumab Monotherapy With or Without Recombinant Human Hyaluronidase PH20 (rHuPH20)
Protocol Number:	578228570700603510
NCT Number:	NCT03656718
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	nivolumab
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Maximum Observed Serum Nivolumab Concentration (Cmax) - Parts A, B, D, and E: Cmax is the maximum observed serum nivolumab concentration. Collected for Arm A, B, and D on Cycle 1 Day 1, Cycle 1 Day 2, Cycle 1 Day 4, Cycle 1 Day 8, Cycle 1 Day 15, and Cycle 1 Day 21. Collected for Arm E on Cycle 1 Day 1, Cycle 1 Day 2, Cycle 1 Day 4, Cycle 1 Day 8, Cycle 1 Day 15. 2. Time Taken to Reach Cmax (Tmax) - Parts A, B, D, and E: Tmax is the time taken to reach the maximum observed serum nivolumab concentration (Cmax). Collected for Arm A, B, and D on Cycle 1 Day 1, Cycle 1 Day 2, Cycle 1 Day 4, Cycle 1 Day 8, Cycle 1 Day 15, and Cycle 1 Day 21. Collected for Arm E on Cycle 1 Day 1, Cycle 1 Day 2, Cycle 1 Day 4, Cycle 1 Day 8, Cycle 1 Day 15. 3. Area Under the Time-Serum Nivolumab Concentration Curve (AUC (TAU)) - Parts A, B, D, and E: AUC (TAU) is the area measured under the concentration-time curve taken over the dosing interval. Collected for Arm A, B, and D on Cycle 1 Day 1, Cycle 1 Day 2, Cycle 1 Day 4, Cycle 1 Day 8, Cycle 1 Day 15, and Cycle 1 Day 21. Collected for Arm E on Cycle 1 Day 1, Cycle 1 Day 2, Cycle 1 Day 4, Cycle 1 Day 8, Cycle 1 Day 15.
Secondary Obj.:	1. Number of Participants Experiencing Adverse Events (AEs) 2. Number of Participants Experiencing Treatment Related Adverse Events (TRAEs) 3. Number of Participants Experiencing Serious Adverse Events (SAEs)

2.2 Background & Rationale

The purpose of this study is to investigate the effects of nivolumab when given under the skin with or without rHuPH20.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: COMPLETED
Target N:	139

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Histologic or cytologic confirmation of advanced (metastatic and/or unresectable) solid tumors of one of the following tumor types:

1. Metastatic squamous or non-squamous NSCLC
2. RCC, advanced or metastatic
3. Melanoma
4. HCC
5. CRC, metastatic (MSI-H or dMMR)
6. In Part B, other solid tumor types may be considered at the discretion of the Medical Monitor
7. In Part E, Metastatic urothelial carcinoma

* Measurable disease as per RECIST version 1.1 criteria

* ECOG performance status of 0 or 1

4.2 Exclusion Criteria

* Active brain metastases or leptomeningeal metastases

* Ocular melanoma

* Active, known, or suspected autoimmune disease

Other protocol defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 578228570700603510

Registry Number: NCT03656718

Sponsor: Bristol Myers Squibb

Study Title: A Study of Subcutaneous Nivolumab Monotherapy With or Without Recombinant Human Hyaluronidase PH20 (rHuPH20)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
