

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1b/2 Study of BMS-986158 Monotherapy and in Combination With Either Ruxolitinib or Fedratinib in Participants With DIPSS-Intermediate or High Risk Myelofibrosis
Short Title:	A Study to Assess the Safety and Tolerability of BMS-986158 Alone and in Combination With Either Ruxolitinib or Fedratinib in Participants With Blood Cancer (Myelofibrosis)
Protocol Number:	606596493447202653
NCT Number:	NCT04817007
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	ruxolitinib
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Incidence of adverse events (AEs) 2. Incidence of serious adverse events (SAEs) 3. Incidence of AEs meeting protocol-defined dose-limiting toxicity (DLT) criteria
Secondary Obj.:	1. Spleen volume reduction (SVR) at end of Cycle 6 assessed by Blinded Independent Central Review (BICR) 2. Response rate defined as proportion of participants with SVR ≥ 35% by MRI (preferred) or CT (if MRI is contraindicated and if CT is allowed by local guidelines) assessed by BICR 3. SVR at end of Cycle 3 and 6 assessed by BICR

2.2 Background & Rationale

The purpose of this study is to assess the safety, tolerability, and efficacy of BMS-986158 alone and in combination with either Ruxolitinib or Fedratinib in participants with Dynamic International Prognostic Scoring System (DIPSS)-intermediate or high risk blood cancer. Part 1 consists of BMS-986158 in combination with either Ruxolitinib or Fedratinib and Part 2 consists of BMS-986158 in combination with either Ruxolitinib or Fedratinib and BMS-986158 alone.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, ACTIVE_NOT_RECRUITING	Phase: PHASE1, PHASE2,	Status:
Target N:	216		

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Diagnosis of primary myelofibrosis (PMF), post-essential thrombocythemia (ET) or post-polycythemia vera (PV)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

myelofibrosis

* Treatment-related toxicities from prior therapy resolved to Grade 1 or pre-treatment baseline or determined to be irreversible prior to study treatment

* Must agree to follow specific methods of contraception, if applicable

4.2 Exclusion Criteria

* Women who are pregnant or breastfeeding at screening

* Any significant acute or uncontrolled chronic medical illness

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 606596493447202653

Registry Number: NCT04817007

Sponsor: Bristol Myers Squibb

Study Title: A Study to Assess the Safety and Tolerability of BMS-986158 Alone and in Combination With Either Ruxolitinib or Fedratinib in Participants With Blood Cancer (Myelofibrosis)

15. Sign-off & Approval
