

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1b/2 Study of Immune and Targeted Combination Therapies in Participants With RCC (KEYMAKER-U03): Substudy 03C in Participants With Recurrent Disease During or After Anti-PD-(L)1 Adjuvant Therapy
Short Title:	Substudy 03C: A Study of Combination Therapies in Participants With Renal Cell Carcinoma With Recurrent Disease During or After Anti-PD-(L)1 Therapy (MK-3475-03C/KEYMAKER-U03)
Protocol Number:	935987443002777578
NCT Number:	NCT07049926
Sponsor Name:	Merck
Investigational Product:	belzutifan
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Safety Lead In Phase: Number of participants who experience one or more dose-limiting toxicities (DLTs): DLTs are defined as any of a pre-specified list of toxicities if assessed by the investigator to be possibly, probably, or definitely related to study treatment administration, excluding toxicities clearly not related to the drug, such as disease progression, environmental factors, unrelated trauma, etc. 2. Safety Lead In Phase: Number of participants who experience one or more adverse events (AEs): An AE is any untoward medical occurrence in a clinical study participant, temporally associated with the use of study intervention, whether or not considered related to the study intervention. An AE can therefore be any unfavorable and unintended sign (including an abnormal laboratory finding), symptom, or disease (new or exacerbated) temporally associated with the use of a study intervention. 3. Safety Lead In Phase: Number of participants who discontinue study treatment due to an AE: An AE is any untoward medical occurrence in a clinical study participant, temporally associated with the use of study intervention, whether or not considered related to the study intervention. An AE can therefore be any unfavorable and unintended sign (including an abnormal laboratory finding), symptom, or disease (new or exacerbated) temporally associated with the use of a study intervention.
Secondary Obj.:	1. Efficacy Phase: Duration of response (DOR) 2. Efficacy Phase: Progression-free survival (PFS) 3. Efficacy Phase: Overall survival (OS)

2.2 Background & Rationale

Substudy 03C is part of a larger research study that is testing experimental treatments for renal cell carcinoma (RCC).

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

The larger study is the umbrella study (U03).

3. Study Design & Methodology

Design Framework: Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: RECRUITING
Target N: 140

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID: 935987443002777578
Registry Number: NCT07049926
Sponsor: Merck
Study Title: Substudy 03C: A Study of Combination Therapies in Participants With Renal Cell Carcinoma With Recurrent Disease During or After Anti-PD-(L)1 Therapy (MK-3475-03C/KEYMAKER-U03)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
