

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase Ib/II, Open-Label, Multicenter, Randomized Umbrella Study Evaluating the Efficacy and Safety of Multiple Immunotherapy-Based Treatments and Combinations in Patients With Urothelial Carcinoma (MORPHEUS-UC)
Short Title:	Study Evaluating the Efficacy and Safety of Multiple Immunotherapy-Based Treatments and Combinations in Patients With Urothelial Carcinoma (MORPHEUS-UC)
Protocol Number:	943336558793472470
NCT Number:	NCT03869190
Sponsor Name:	Roche
Investigational Product:	cisplatin
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Objective Response Rate (ORR) for mUC Cohort Stage 1: Objective response rate, defined as the proportion of participants with a CR or PR on two consecutive occasions ≥ 4 weeks apart during Stage 1, as determined by the investigator according to RECIST v1.1. 2. pCR for Muscle Invasive Bladder Cancer (MIBC) Cohorts: pCR, defined as the proportion of participants with an absence of residual invasive cancer of the complete resected specimen.
Secondary Obj.:	1. Progression Free Survival (PFS) for mUC Cohort Stage 1 2. Overall Survival (OS) for mUC Cohort Stage 1 3. Overall Survival (at specific time-points) for mUC Cohort Stage 1

2.2 Background & Rationale

A Phase Ib/II, open-label, multicenter, randomized, umbrella study in participants with MIBC and in participants with locally advanced or metastatic Urothelial Carcinoma (UC) who have progressed during or following a platinum-containing regimen. The study is designed with the flexibility to open new treatment arms as new treatments become available, close existing treatment arms that demonstrate minimal clinical activity or unacceptable toxicity, or modify the participant population (e.g., with regard to prior anti-cancer treatment or biomarker status). Participants in the mUC Cohort who experience loss of clinical benefit or unacceptable toxicity during Stage 1 may be eligible to continue treatment with a different treatment regimen for Stage 2.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL,	Phase: PHASE1, PHASE2,	Status: ACTIVE_NOT_RECRUITING
Target N:	272
