

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2, Open-label, Randomized Controlled Trial of BMS-986218 or BMS-986218 Plus Nivolumab in Combination With Docetaxel in Participants With Metastatic Castration-resistant Prostate Cancer
Short Title:	A Study of BMS-986218 or BMS-986218 Plus Nivolumab in Combination With Docetaxel in Participants With Metastatic Castration-resistant Prostate Cancer
Protocol Number:	987628428492287200
NCT Number:	NCT05169684
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	docetaxel
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:

1. Number of Participants With Treatment Related Adverse Events: Adverse events will presented using National Cancer Institute Common Terminology Criteria for Adverse Events version 5 (NCI CTCAE v5).
2. Number of Participants With Treatment Related Serious Adverse Events: Adverse events will presented using National Cancer Institute Common Terminology Criteria for Adverse Events version 5 (NCI CTCAE v5).
3. Number of Participants With Dose Limiting Toxicities: DLTs will be defined as:

Any treatment-related AEs for which a participant permanently discontinues a study treatment (other than daily prednisone) and that occurs during the first 2 cycles of treatment.

Any death not clearly due to the underlying disease or extraneous causes and that occurs during the first 2 cycles of treatment Greater than or equal to Grade 2 pneumonitis lasting greater than 5 days despite appropriate medical therapy and that occurs during the first 2 cycles of treatment Any neutropenic fever as well as Grade 4 neutropenia or thrombocytopenia for ≥ 7 days that occurs during the first 2 cycles of treatment Any treatment-related AE that delays initiation of Cycle 2 or Cycle 3 of treatment by greater than 2 consecutive weeks.

Secondary Obj.:

1. Prostate Specific Antigen Response Rate (PSA-RR)
2. Objective Response Rate
3. Time to Response

2.2 Background & Rationale

The purpose of this study is to assess the safety, efficacy, tolerability, and toxicity of docetaxel alone, in combination

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

with BMS-986218, or in combination with nivolumab plus BMS-986218 in men who have metastatic castration-resistant prostate cancer (mCRPC) that progressed after novel antiandrogen therapy and have not received chemotherapy for mCRPC.

3. Study Design & Methodology

Design Framework: Type: INTERVENTIONAL, Phase: PHASE2, Status: TERMINATED

Target N: 10

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Histologic confirmation of carcinoma of the prostate without small cell features
- * Documented prostate cancer progression by Prostate Cancer Working Group 3 (PCWG3) criteria while castrate
- * Evidence of metastatic disease documented by either bone lesions on radionuclide bone scan and/or soft tissue lesions on computed tomography (CT)/magnetic resonance imaging (MRI)
- * Eastern Cooperative Oncology Group (ECOG) performance status 0 to 1
- * Ongoing androgen deprivation therapy (ADT) with a gonadotropin-releasing hormone (GnRH) agonist/antagonist or bilateral orchiectomy (i.e., surgical or medical castration) confirmed by testosterone level ≤ 1.73 nmol/L (50 ng/dL) at the screening visit
- * Chemotherapy-naïve for metastatic castration-resistant prostate cancer (mCRPC) and have received at least one novel antiandrogen therapy (NAT)

4.2 Exclusion Criteria

- * Concurrent malignancy (present during screening) requiring treatment or history of prior malignancy active within 2 years prior to treatment assignment in Part 1 or randomization in Part 2
- * Untreated central nervous system (CNS) metastases
- * Leptomeningeal metastases
- * Active, known or suspected autoimmune disease

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 987628428492287200

Registry Number: NCT05169684

Sponsor: Bristol Myers Squibb

Study Title: A Study of BMS-986218 or BMS-986218 Plus Nivolumab in Combination With Docetaxel in Participants With Metastatic Castration-resistant Prostate Cancer

15. Sign-off & Approval
